#1 Missing FAQPage Knowledge Schema

Impact: HIGH

Effort: LOW

Plain English Business Explanation: JSON-LD schema is machine code that tells AI search engines exact facts about your business.

Exact Crawled Evidence:
Page 'www.boat-lifestyle.com' contains 1 JSON-LD block(s), but lacks explicitly typed 'FAQPage' schema.

Why Generative AI Engines Care:
RAG bots prioritize structured JSON schema objects over unstructured HTML paragraphs when picking answer sources.

#2

Missing E-E-A-T Author & Social Identity Links

Impact:
MEDIUM**Effort:**
LOW

 **Plain English Business Explanation:** E-E-A-T stands for Experience, Expertise, Authoritativeness, and Trustworthiness—how AI checks if you're a legitimate source.

 Exact Crawled Evidence:

No Person/Author schema or `sameAs` social profile verification links found on www.boat-lifestyle.com.

 Why Generative AI Engines Care:

SearchGPT and Claude rank content higher when author identity and social profiles are verified against external knowledge bases.

#3

Unstructured Q&A Heading Passages

Impact: HIGH**Effort:** LOW

 **Plain English Business Explanation:** Question Chunking means writing headers as exact questions users ask AI, followed immediately by a 1–2 sentence answer.

 **Exact Crawled Evidence:**

Only 1 question-formatted header(s) detected out of 10 total heading tags.

 **Why Generative AI Engines Care:**

SearchGPT splits pages into text blocks. Blocks starting with a question header get much higher citation rank.
